● **Precautions in DIY mode**

(1)Each time period must be set. Only L1 can set the start time. The start time of L2-L8 is the end time of the previous time period.

(2)If do not want to turn on the light at which time period, can set the all color brightness to 0.

(3)In order to avoid the light changing too quickly in the process of switching, this product will switch slowly within 3 minutes.The change process from L8 to L1 takes 15 minutes.For example:the L1 period of time is 6:00-8:00, L2 period of time is 8:00-10:00,the light will slowly switch from the L1 period of the program to the L2 at 9:57.

Example set the following parameters in DIY mode :

L1	6:00-8:00	W10% R0% B0% G0%
L2	8:00-10:00	W50% R0% B0% G0%
L3	10:00-12:00	W80% R0% B0% G0%
L4	12:00-14:00	W100% R0% B0% G0%
L5	14:00-16:00	W80% R0% B0% G0%
L6	16:00-18:00	W50% R0% B0% G0%
L7	18:00-20:30	W10% R0% B0% G0%
L8	20:30-06:00	W 0% R0% B0% G0%

The light change chart is as follows

◆ Restore factory settings

● **Restore factory settings:** Long press the down button and the colored button for 8 seconds, and SOP appears on the screen to restore the factory settings.

Note: In order to avoid the light from changing too quickly, during the switching process, this product will switch slowly within 3 minutes.

◆ Detailed explanation of possible problems in use

- (1) In the 51 day mode/ 52 night mode/ 53 DIY mode, if press the bulb button to turn off the light and then turn it on again, the program settings of the current day cannot be restored, and the program settings will be automatically restored the next day.
- (2) If 51 day mode/ 52 night mode/ 53 DIY mode mode is turned on at the same time, the system will automatically follow the last set mode.
- (3) 51 day mode and 52 night mode do not conflict, can exist at the same time. 53 DIY mode and 51 day mode/ 52 night mode conflict, and the system will automatically follow the last set mode.
- (4) Long press “▲” and “▼” buttons can Increase or decrease the number continuously and rapidly.
- (5) The brightness display of the screen panel is the average of the sum of "W R B G". For example, if W 70% R 40% B 20% G 50% is set, the brightness displayed on the screen during operation is 45%.

5.ATTENTIONS

- ✓ Please read this user manual carefully before using and follow it strictly.
- ✓ Please keep the switch away from water since it is not waterproof.
- ✓ Please keep the light away from flammable items to avoid accidents.
- ✓ Please unplug the power and contact the seller if the light is not working properly. ****OPENING WILL VOID WARRANTY****
- ✓ Please unplug the power before maintenance.
- ✓ Please mind that the temperature range for the light is between 23 °F~113°F (-5 °C~45 °C).

6.WARNING

To avoid possible electric shock, do not immerse the switch in the water. If the switch falls into the water or becomes wet, do not touch it until you have unplugged it. Basic safety precautions that should be observed are as follows:

- 1.Read and follow this user manual strictly.
- 2.DANGER- To avoid possible electric shock, special care should be taken since water is employed in the use of aquarium equipment. For each of the following situations, do not attempt to repair yourself. Instead, return the light to an authorized service facility for maintenance or discard it.
 - A.If the light falls into the water, DO NOT touch it. First unplug it, then retrieve it. If electrical components of the light get wet, unplug it immediately.
 - B.Carefully examine the light after installation. It should not be plugged in if there is water on parts that are not intended to be wet.
 - C.Do not operate the light if it has a damaged cord or plug, is malfunctioning, dropped, or damaged in any manner. The power cord of this light cannot be replaced. If the cord is damaged, the light should be discarded.
 - D.To avoid the possibility of the light plug getting wet, position the aquarium and its stand to one side of a wall mounted outlet to prevent water from dripping onto the outlet or plug. A "drip loop", shown in the figure below, should be arranged by the user for each cord, which

connects the light to the outlet. If an extension cord is used, the “drip loop” is the part of the cord below the level of the outlet or the connector that prevents water from traveling along the cord and coming in contact with the outlet. If the plug or outlet does get wet, DO NOT unplug the cord. Disconnect the fuse to the circuit breaker that supplies power to the light. Then, unplug and examine for the presence of water in the outlet. If you are not sure, consult a certified electrician.

3. Close supervision is necessary when the light is used near children.
4. To avoid injury, do not contact moving or hot parts.
5. Make sure the light is securely installed before operating it.
6. Read and observe all the important notices on the light.
7. If an extension cord is necessary, a cord with a proper rating should be used, such as rated amperes or watts. A cord rated for fewer amperes or watts than the appliance rating may overheat. Care should be taken to arrange the cord so that it will not be tripped over or pulled.
8. The light is intended FOR HOUSEHOLD USE ONLY.
9. SAVE THIS USER MANUAL.
